Extension of cable protection range

WISKA presents 3 new variants of its BraceFITTING

Within its Brace® cable protection range, WISKA now offers further variants of its own in-house fitting innovation: The existing standard BraceFitting is supplemented by new adaptors for the extension of corrugated pipes and Y- and T-connectors. The new versions also fulfil all the quality features of the standard, including the high protection class of IP 68, delivery in a completely assembled one-piece component, the directly injected seal and the innovative 360° clasp mechanism. All these features ensure a high degree of safety and at the same time very easy installation and convenient maintenance, manufactured with the high plastics competence at WISKA. The non-metallic fittings are also available with metal connecting thread or (EMC) cable gland, as 45° or 90° angle and pressure compensation variant with the own VentGLAND®. The Brace® cable protection range is part of WISKA's comprehensive assortment of cable entries, including also cable glands, grommets and cable entry systems for trade and industry.
